

EDGE® ROCK, STANDARD AUGER BITS

The EDGE rock auger bits feature a reinforced fabricated boring head, double wrapped 5/16" flighting, conical carbide teeth and a standard "fishtail" center point. EDGE rock auger bits are not intended for use in concrete or asphalt applications.

AUGER BIT BASICS

EDGE offers the following types of auger bits: tree and shrub, rock and frost. The auger bits are available in sizes ranging from 4" to 36". The tree and shrub auger bit is designed with smaller diameter auger flighting at the bottom to leave space for root balls, fertilizer or mulch. Rock auger bits have conical (also called "bullet") teeth to cut through the toughest ground and are available with standard, "fishtail" or conical center points. Other auger accessories include auger extensions and auger adapters for round to hex, hex to round and 2" round.

SPECIFICATIONS

Model	Weight (lbs/kg)	No. of Teeth	Tooth Style
RSQ6	75/34	3	Conical
RSQ9	85/39	6	Conical
RSQ12	110/50	6	Conical
RSQ15	150/68	7	Conical
RSQ18	165/75	8	Conical
RSQ24	220/100	12	Conical
RSQ36	286/130	18	Conical

FEATURES

- Reinforced fabricated boring head
- Conical carbide replaceable teeth and standard "fishtail" center point
- Not intended for use in concrete or asphalt applications
